

DANTE CORSO

[856-723-0942](tel:856-723-0942) | corsodante8@gmail.com | Williamstown, NJ | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

DevOps Engineer specializing in cloud automation, CI/CD pipelines, and Azure-based infrastructure. Experienced in building reliable, scalable cloud-native systems, internal tooling, and automation solutions that improve operational efficiency, system reliability, and response times.

SKILLS

Languages & Frameworks: Python, JavaScript, Terraform, Go, Java

Web Development: Node.js, React, Django (internal tooling & automation interfaces)

Databases & Cloud: Azure, AWS, Google Cloud, SQL, Firestore, MongoDB, Docker, Kubernetes

APIs & Tools: REST APIs, OAuth 2.0, Git, GitHub Actions, Azure DevOps, CI/CD, Agile, Jira

PROJECTS

- **Task Management Web App:** Designed and implemented a cloud-native task management system focused on real-time performance and scalability. Built on Firebase with optimized Firestore indexing to support fast data access, reliable state synchronization, and production-ready backend architecture.
- **AI Code Analyzer:** Built an AI-powered automation tool leveraging OpenAI's GPT-4 API to analyze source code and generate structured insights. Used to automate code understanding, identify inefficiencies, and improve maintainability, reducing manual review effort in development workflows.

WORK EXPERIENCE

E3 IT Services | Azure DevOps Engineer | 2024 – Present

- **On-Call Management Web App:** Designed and maintained an internal automation platform using Azure Functions, Python, and JavaScript to support on-call workflows, improving reliability and reducing response times by **25%**.
- **Automated Call Transcription:** Engineered an event-driven automation pipeline using Azure Functions, Azure Logic Apps, and Azure Cognitive Services to convert voicemail recordings into text and automatically attach transcripts to support tickets, streamlining incident response.
- **AI Foundry Search:** Built a cloud-based search and automation backend using Azure Functions and AI Foundry to dynamically generate structured JSON queries across tickets, tasks, projects, contracts, and contacts via the Autotask API. Implemented a secondary AI layer to enrich results with contextual insights. Delivered via Azure Static Web Apps.
- **Custom Integrations:** Developed automation scripts and CI/CD integrations using Azure DevOps to standardize deployments, reduce manual intervention, and support scalable client environments.

P&S Ravioli Company | Full Stack Developer - Freelance | 2024

- Developed a full stack application for inventory with real-time monitoring, and actionable data insights, boosting efficiency by **30%**.
- Designed an intuitive dashboard with advanced filtering and search capabilities, reducing inventory lookup time by **50%**
- Integrated Firestore for real-time inventory updates, minimizing stock lookup by 30% and enhancing accuracy across locations
- Automated PDF-based reporting pipelines to support audits and logistics, increasing delivery driver efficiency by **45%**.

Dolce Vita Gelato | Full Stack Developer | 2023 - 2024

- Built a mobile ordering and kiosk system using JavaScript (Node.js, Firebase) with real-time tracking, secure payments (Stripe API), and location-based check-ins, reducing wait times by 20%.
- Architected a dynamic digital signage platform that displays rotating menus and promotional content, seamlessly integrating with a Firebase backend for real-time updates. The system pulls the latest menu data and media assets, reducing pricing errors by 40%.
- Integrated all components into a cohesive digital solution, ensuring seamless synchronization across applications for up-to-date content, streamlining operations, and boosting revenue by 20%.

EDUCATION

Bachelor of Science, Computer Science | Rowan University

Associate of Science, Computer Science | Rowan College of South Jersey

Eagle Scout | Boy Scouts of America
